

## Professional Warehouse Developer Studio

### Power tools for Microsoft BI

# Datasheet

**CloudOLAP Developer Studio Pro** is a user-friendly toolset for auto generating end-to-end professional Microsoft data warehouses, ETL, scheduling and scripts. With CloudOLAP Developer Studio Pro you may scale your intelligence, cut costs and implementation time by 90% and improve balancing and performance. CloudOLAP Developer PRO auto generates ETL processes, star schemas, cube structures and dimensions as well as MDX and SQL code. This approach means that the time-to-market for your Business Intelligence project is greatly reduced. From CloudOLAP Developer Studio Pro you can manage your local intranet BI, as well as cloud based servers on the Amazon EC2 Cloud. If you need extra capacity, servers with 2-20 CPUs and 8-68Gb of RAM may be instantiated and added in less than 10 minutes on demand.

#### Features and Benefits:

- ✓ Rapid professional warehouse and ETL generation
- ✓ Automatic star-schema, cube structure, scheduling generation
- ✓ Deployment of ETL tasks to Automation Servers on-premises or on the cloud
- ✓ Embedded lightweight Automation Server
- ✓ Extensibility via .NET SDK and Scriptlet microlanguage

#### Requirements

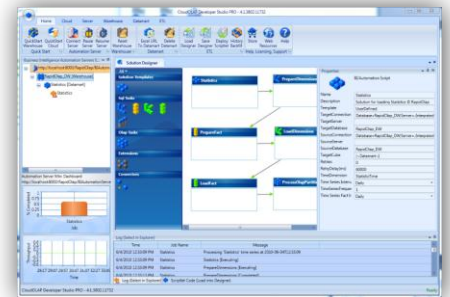

32 or 64-bit

Microsoft SQL Server 2005, 2008, R2

Microsoft Analysis Services

Windows XP, 7, Vista, Server 2000, 2003, 2008

.NET 3.5 SP 1
